

MODEL 374-LED

LED Traffic Indicator

Our LED traffic indicators provide a durable, economical solution to all red / green indicator signage with applications in the parking, banking, traffic and industrial markets.

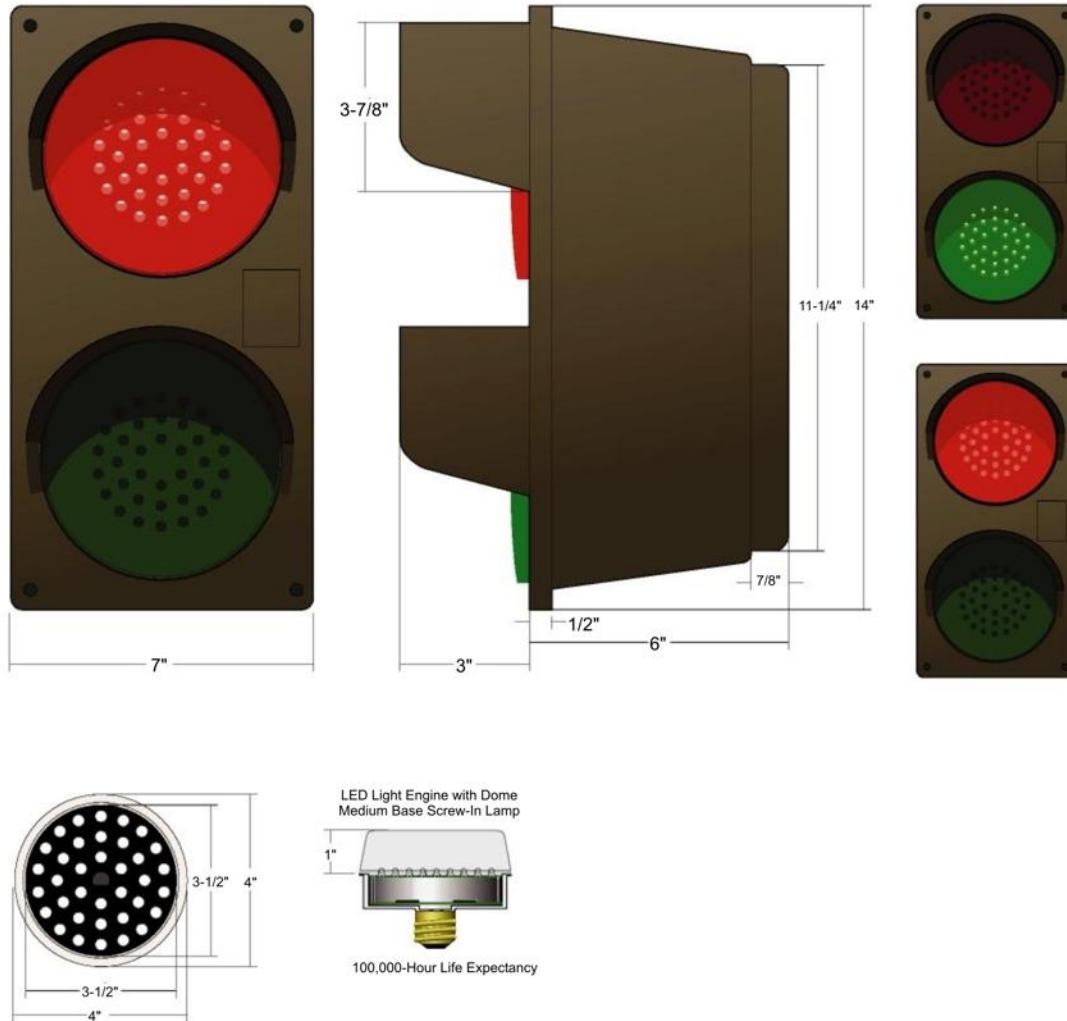

The 14"H X 7"W X 9"D unit is injected molded of impact resistant polycarbonate, making it extremely durable, light weight and maintenance free. The unit includes two long life LED light engines and features 5-1/2" diameter red and green lenses.

The Model 374-LED can be ordered for vertical (374-LEDV) or horizontal (374-LEDH) mount.
